EXPERIENCE

The Omni Group
Software Test Pilot

📅 2015-Ongoing 📍 Seattle

- Introduced load testing by researching, designing, and co-building a cross browser test automation framework using Selenium Webdriver, Selenium Grid, webdriver.io, Node.js, and JavaScript with Docker.
- Isolated defects and suggested improvements in complex software across macOS, iOS and watchOS.
- Assessed, refined and documented dependable syncing workflows with a wide variety of popular cloud hosting services.
- Pinpointed performance issues and hangs using Xcode, Instruments and Terminal.

Sinclair Broadcast Group
Agile Tester

📅 2014-2015 📍 Seattle

- Developed Python scripts to assist setup for testing to improve perceived performance and validate lazy loading.
- Created complex API tests in PAW to test RESTful services with JSON before the UI was testable.
- Wrote the security test plan, incorporating feedback from business users.

Silicon Publishing Inc.
Director of Quality

📅 2011-2014 📍 Remote

- Continuously interacted with clients, developers and company leadership resulting in improved quality both of Silicon Publishing products and integrated client websites.
- Wrote agile test strategy, test plans, delivery acceptance criteria and support contracts for clients.
- Collaborated with developers using Jenkins for continuous integration internally on cloud environments, and customized release deployments to client servers.
- Created a phased strategy for cloud testing (Amazon AWS), for server based testing and browser validation.
- Tracked user stories, customer fixes, release notes and multiple projects using Jira, Pivotal Tracker and Wiki.

Spark Quality & Sogeti
Senior Consultant

📅 2010-2012 📍 Seattle, Indiana

- Piloted tester/developer pairing at code completion to add to an already mature test case creation process which resulted in earlier detection of defects and requirements gaps, and identified duplication of effort in unit tests.
- Managed a Pivotal Tracker project to help visualize and schedule testing activities larger than a story.
- Identified a solution to a blocking client issue. Paired with a developer to research and address the issue quickly, securing a client contract.
- Completed projects on time and on budget, with the team reputation at an all time high.
- Implemented a tool-assisted strategy for data validation for a SaaS system tracking grocery products across the United States, allowing the deployment of all product lines.

Adobe Systems Inc.
Quality Lead

📅 2000-2010 📍 Seattle

- Designed and co-wrote Python scripts to test the performance of the end-to-end system, identifying bugs that lowered success rates.
- Coordinated testing of workflows spanning all products in the Adobe Creative Suites through CS5.
- Tested an internal java application that interacted with an Oracle database and front end dashboard which reduced the time to validate Creative Suite media from several months to under two weeks, saving millions of dollars for the company and earning the team an award.
- Organized internal quality events for up to 500 quality professionals to promote sharing test ideas across silos.

EDUCATION

Certificate in JavaScript Development
University of Washington

Graphic Design
Western Washington University

Associate of Arts
Green River College

COMMUNITY INVOLVEMENT

Nurturing New Developers
💬 October 2019 📍 London, England
Presentation for SeleniumConf

Leading Exploratory Testing Workshop
📅 August 2019 📍 Washington, DC
2 Part Interactive Workshop for Agile 2019

The Omni Show 🔗
🗓 May 2019 📍 Seattle, WA
Podcast about testing at The Omni Group

Test Like a Cat 🔗
▶️ October 2018 📍 Pottsdam
Keynote for Agile Testing Days

SKILLS

JavaScript	Git	Node
React.JS	Terminal	Xcode
Selenium Webdriver		PAW
Postman	Mobile Testing	
API	Exploratory Testing	
JIRA	Pivotal Tracker	
TDD	Pair Programming	
Python (Scripting)	Agile
